

## HandPunch® 3000E XL

### Biometric Time & Attendance Terminal

**Put your hands on the accurate, affordable solution.**

Schlage now brings the accuracy and convenience of biometric technology easily within reach of any time and attendance applications. In operations that range from coal mines to clean rooms, Schlage have proven themselves to be a practical and precise solution. Our terminals are so affordable, it doesn't make sense to consider any other technology.

#### Smarter than card-based terminals

There are no cards to create, administer, carry, or lose. The HandPunch® 3000E XL verifies employees' identities in less than one second, based on the unique size and shape of their hands. HandPunch 3000E XL clearly notifies each user of a match using red and green indicator lights. Because no one can punch in or out for your employees, the system reduces time theft and improves payroll accuracy.

#### Versatile and programmable

Programmable beyond a simple time clock, the HandPunch 3000E XL provides definable data management keys that allow data collection when employees punch. The systems transmit data to the time and attendance host PC through a variety of options, depending on the model. Model differences let you tailor the right system for your company's size and needs. When you want to cut time and attendance costs...do it by hand.

#### Break Compliance

The HandPunch 3000-E XL hand geometry reader help employers comply with labor "meal" laws that is currently used by more than 20 states. With the help of the AMG Time Attendance Software, the Schlage HandPunch 3000-E XL "Break Compliance" capability makes it impossible for the employee to clock in early from lunch or breaks.

#### Features and Benefits

- Saves money over card-based systems
- Eliminates badges
- Eliminates buddy punching
- Fast and easy to use
- Provides the most accurate time and attendance solution available.
- Comes with standard Ethernet card

## **Hand Geometry Technology**

The HandPunch 3000E XL uses Schlage's field-proven hand geometry biometric technology. The terminal captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No fingerprints or palm prints are utilized. Green and red lights notify the employee of the status of each punch. There's no question any more; employees have to be there to punch.

## **Programmable Data Management Keys**

The HandPunch 3000E XL has two user-definable data management keys that let you collect data as employees punch. Common uses include department transfers, tips collected, job codes, or pay codes. Multi-level data entry sequences may be defined. You can also set the data management keys to allow employees to review their past punches. To reduce keystrokes, the keys can also be set to automatically enter data such as a frequently used department number or in/out status.

## **Affordable Ethernet Solution**

A HandPunch 3000E XL recognition system comes standard with built-in Ethernet (TCP/IP) connectivity, allowing for quick integration into your existing network infrastructure and time management systems.

## **Edit-at-the-Clock Functions**

The HandPunch 3000E XL allows supervisors to override user restrictions and to input such items as missed punches, planned vacations, and sick time at the terminal. The password-protected mode provides greater supervisor flexibility by lessening the need for computer edits. Audit trails documenting the use of these functions are generated to ensure security.

## **Bell Schedules**

The bell schedule lets you program the day, time, and duration of a series of bells. The bells can be programmed to signal the beginning or end of a shift, lunch, or break.

## **Door Control**

The HandPunch 3000E XL provides the capability to unlock and monitor a door. Global timezones may be used to restrict employee access.

## **Antimicrobial Protection**

Every HandPunch contains a silver-based antimicrobial agent, which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the HandPunch.

## **Hand Outline**

The HandPunch comes standard with a blue hand outline printed on the platen. This hand outline will help new users place their hand accurately on the platen when using the terminal and decrease initial enrollment time.

<b>Specifications</b>		
<b>Part Number</b>	HP-3000E XL	
<b>Size</b>	8.85 in (22.3 cm) wide 11.65 in (29.6 cm) high 8.55 in (21.7 cm) deep	
<b>Weight</b>	6 lbs (2.7 kg)	
<b>Power</b>	12 to 24 VDC or 12 to 24 VAC 50-60 Hz, 7 watts	
<b>Environment</b>	Operating: 32°F to 113°F (0°C to 45°C) Relative Humidity: 20% to 80% NC Non-operating (storage): 14°F to 140°F (-10°C to 60°C) Relative Humidity: 5% to 85% NC	
<b>Verification Time</b>	Less than one second	
<b>Memory Retention</b>	Up to 5 years via the standard internal lithium battery.	
<b>Transaction Storage</b>	5120 transactions	
<b>ID Number Length</b>	1 to 10 digits from keypad or card	
<b>User Capacity</b>	512 users with field upgrade up to 32,512 users Memory module upgrade up to 259,072 users	
<b>Template Size</b>	9 bytes	
<b>Communications</b>	Ethernet (TCP/IP)	
<b>Baud Rate</b>	300 to 28.8 Kbps	
<b>Card Reader Input</b>	Proximity, Wiegand, Magnetic Stripe, Bar Code (5 VDC provided by HandReader)	
<b>Card Reader Output</b>	Wiegand, Magnetic Stripe, Bar Code	
<b>Door Controls</b>	Door Lock Output (Sinks 0-24VDC, 100mA max) Door Switch Monitoring Bell Ring Output (Sinks 0-24VDC, 100mA max)	
<b>Time Zones</b>	62 user definable time zones	
<b>Options</b>	BB-250 Operational Battery Backup BC-100 Bar Code Reader Wall Mount DC-102 Data Converter (RS-232 to RS-485) EM-801 Memory Expansion - 9,728 users EM-803 Memory Expansion - 32,512 users EN-200 Ethernet Communications Module MD-500 Internal 14.4 Baud Dial-up Modem WAR-EXT 1 year extended warranty
