

OMNIA Software Suite

Access Control

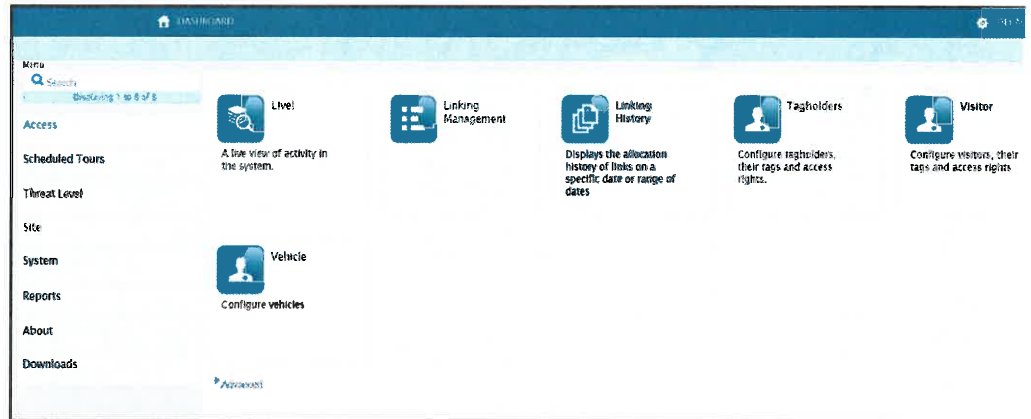

Superior Control Simple to Use

Command superior access control with this web-based system, operating on a single scalable platform that is exceptionally capable with effortless site management.

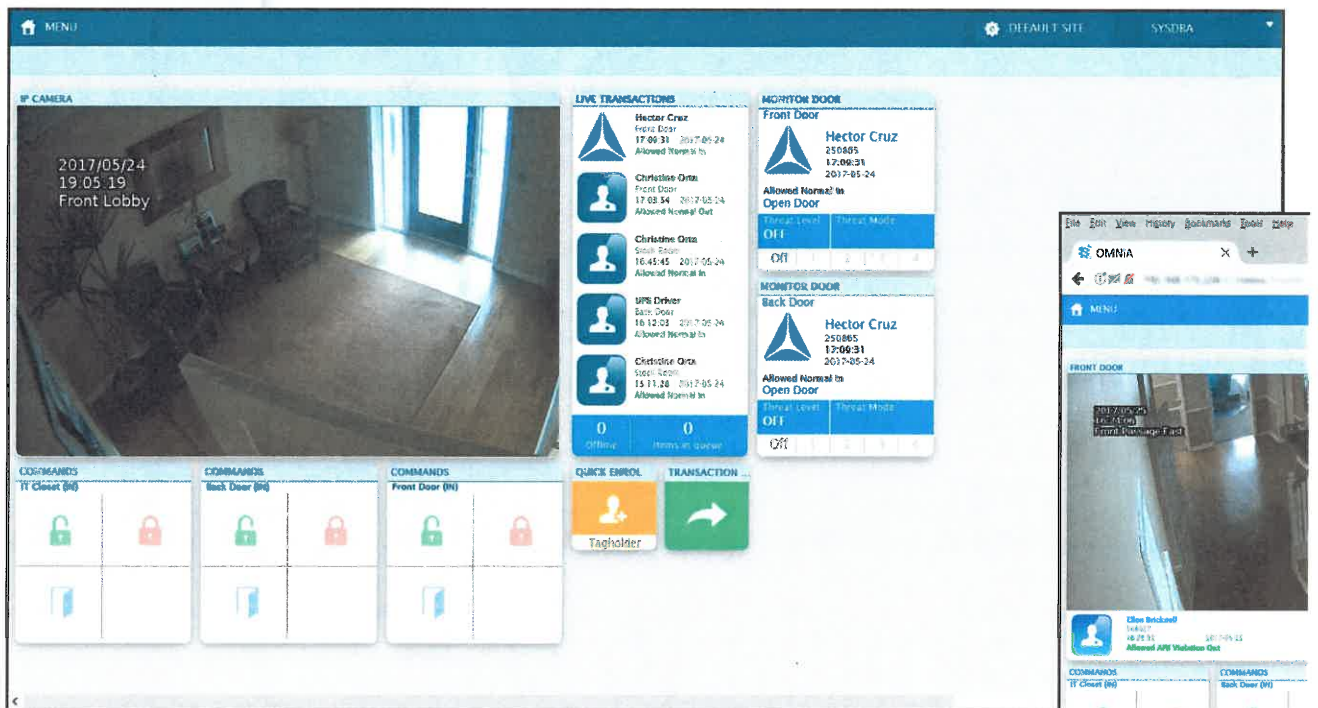

OMNIA vast feature set makes it one of the most scalable and flexible systems available with immense growth potential. Access and view live information and customized reports all from any web-enabled device.

Features:

- Time and event triggered actions
- Tag suspension
- Access groups
- User customized operator security
- Biometric integration
- Browser based user interface
- Web visitor enrollment
- Customizable reports

Easy one click installation of hardware

Convenient dashboard interface with customized widgets

Connect remotely with mobile devices

Manage with any HTML5 enabled device

The Future of Access Management

Quick and easy to install. Even greater flexibility with up to 100 doors per site. The single powerful software platform is remarkably capable, yet simple to configure. The concise and flexible design makes OMNIA an obvious choice for your tailor-made needs, whether managing a single site or an enterprise scale system.

Total Control

From comprehensive tagholder management to fully customizable reporting, OMNIA puts you in command of your system. Real-time data ensures you are in total control.

Reporting

OMNIA allows you to compose customized reports to fit every aspect of your operation. Track, monitor and observe activity from any perspective.

Personalize

Easily change your visual interface to suit your personal preferences. Customize dashboard widgets tailored to specific users.

Personalize your style of management and control at a glance
